Hello Christian;

For the past year and a half, I have been handing out the packets at my parties. As my guests were leaving, I would thank them for attending, and hand them a packet. I have a 100% success rate, meaning: that for everyone who attended my party, they accepted a packet. I am the ONLY sex venue, in the City of New York, that has this policy of safe sex promotion working so successfully.

This means that: the myth of HIV+ guys, who attend an HIV+ sex party, DO NOT always bareback, AND they are willing to accept safe sex packets as they leave the venue. Also; Sex venues are vital assets of communication and promotion for our community. Therefore, sex venues are the front line defense in reaching the community. (Target Marketing)

My Adopt-A-Park Program has the same results, and it's in its second year. The program works the same way as that of the Meatrack, in the Pines on Fire Island.

I'll call you today; and pick up the packets tomorrow (Wed)

Robert Brandon Sandor
