Hi Brandon,.. I have been bad in not responding to you.. but I have been up to my ears in work. We still have not had out sero-sorting forum but we are going to have a Gay Men's Forum in Dec and yes you will be at the table.

Actually I have been wanting to get to you because Dan O'Connell and I would like to have lunch with you sometime in the near future to talk about your Forum and sero-sorting in general.

Just to let you we have been having internal discussions and conference calls with the SF people both from the community and health departments regarding how we respond to sero-sorting from a public health perspective. It clear that our thinking is that for positive to positive it is a good sexual harm reduction model and clearly being used by the community and our agencies.

Any way both Dan and I plan on attending your Forum and hope that you can meet with us soon here in the city.
