

Just an FYI about my forum: Serosorting: The future of HIV prevention.

Feel free to pass this on to anyone who MIGHT be interested. [IMAGE] (LOL)

IF you (or others) plan to attend, please bring a notebook for notes. I'll be offering my suggestions to researchers regarding future NIH grant proposal topics. Since Serosorting has not been researched, the opportunities are unlimited, and at the forum, I'll provide all researchers (via the media) the insight needed to stay focused. Let the nationwide "grant proposal feeding frenzy" begin!

After all, I am the pioneer of the Serosorting Concept, and I have 10 years of personal research data to make any claims I wish on the subject. And I will leave it up to you (and other researchers) to prove me correct.

Come to think of it, Peter, it's funny. Remember how you mentioned in the CSVWG meetings "Don't worry Brandon, when we have our meeting about serosorting, you can attend. you'll have a seat at the table." It's funny isn't it? Here I am inviting YOU to MY FORUM before you'll ever have ME attend yours. And I'm asking you to bring a notebook.

Anyway, at least the truth about Serosorting will be presented to the general public - nationwide.

Serosorting: The future of HIV prevention.

Learn what "the experts" refuse to mention about Serosorting, an international revolution promoting HIV prevention and harm reduction.

* When HIV+ people have sex without condoms, with other HIV+ people, NO HIV- person gets infected with HIV. It is a physical impossibility.
